

COVID-19 PPE: DONNING (Conservation Mode)

COVID-19 PPE: Donning

Items Required

- Gown - Standard isolation
- Airborne = N95, Droplet = Surgical mask
- Eye protection - face shield or goggles
- Gloves

Donning Order

1. Hand Hygiene
2. Gown
3. Respirator
4. Eye Protection
5. Gloves

Hand Hygiene

NOTE: Be sure to gather all PPE items and inspect for defects in a safe and clean donning zone. Tie back hair and limit or remove jewelry.

1. Perform quality hand hygiene as instructed. 20 seconds covering all parts of both hands being careful to not recontaminate.
2. Put on gown according to manufacturer recommendations.
3. Place mask over face using the straps and mold bridge to the nose.
Airborne = N95 Droplet = surgical mask
4. Put on eye-protection making sure they do not interfere with your mask.
5. Put on proper size gloves being sure to pull glove over sleeve of the gown.

TAKE PRECAUTIONS TO AVOID CONTAMINATING YOUR PPE

DO NOT ADJUST YOUR PPE WHILE IN THE PATIENT CARE AREA

IF GLOVES BECOME GROSSLY CONTAMINATED, CLEAN THEM W/ EPA APPROVED DISINFECTING WIPES AND PERFORM HAND HYGIENE ON THE GLOVES

Due to evolving guidelines, slight variances may exist from Healthstream video.
